**Subject:** Review of EPA's Underground Injection Control National Technical Workgroup report  
**Attachments:** Pages from NTW - Induced seismicity report DRAFT part 1.pdf

Good morning Charles,

I'm contacting you, on Phil's behalf, to ask you to review and provide comment on EPA's Underground Injection Control National Technical Workgroup draft report entitled, "Minimizing and Managing Potential Impacts of Induced-Seismicity from Class II Disposal Wells: Practical Approaches." You have been added to the review team, because of your interactions with injection well projects located near deep basement faults.

This report is still draft deliberative and EPA does not plan to make the report public until all comments have been reviewed and final edits to the report are complete. Your cooperation in not releasing the report is critical until you receive a final version of the report. Data used for the report was current through January 31, 2012.

Due to the file size of the report it will be sent in separate e-mails.

We would like to receive your comments by February 28, 2013. Any feedback you can provide is appreciated. Your comments should be sent to Susie McKenzie, the technical lead for the report. Susie's email is [mckenzie.susie@epa.gov](mailto:mckenzie.susie@epa.gov). Also, please confirm the receipt of these emails. If you have any questions regarding the report, please call me at the number below or call one of the following: Susie McKenzie (214-665-7198) or Ken Johnson (214-665-8473).

Thank you. We look forward to your comments.  
Nancy
